

CHANGE TO THE PRE-HEALTH DISCIPLINARY SCREENING PROCESS

We have changed the way we are doing disciplinary screenings with the Office of Student Conduct. You will need to go to the link below and fill out the Release of Student Information Request Form. There are 4 K U H H parts to the Release of Student Information Request Form which must be filled out according to the template included with this document. These are highlighted in

Background Information

Recipient Inbreeding

Assume that the population is in Hardy-Weinberg equilibrium. The frequency of the recessive allele is q .

The frequency of the dominant allele is $p = 1 - q$.

The frequency of the recessive genotype is q^2 .

The frequency of the dominant genotype is $p^2 + 2pq$.

The frequency of the heterozygous genotype is $2pq$.

The frequency of the homozygous dominant genotype is p^2 .

The frequency of the homozygous recessive genotype is q^2 .

The frequency of the heterozygous genotype is $2pq$.

The frequency of the dominant genotype is $p^2 + 2pq$.

The frequency of the recessive genotype is q^2 .

The frequency of the heterozygous genotype is $2pq$.

The frequency of the dominant genotype is $p^2 + 2pq$.

The frequency of the recessive genotype is q^2 .

The frequency of the heterozygous genotype is $2pq$.

The frequency of the dominant genotype is $p^2 + 2pq$.

The frequency of the recessive genotype is q^2 .

The frequency of the heterozygous genotype is $2pq$.

The frequency of the dominant genotype is $p^2 + 2pq$.

The frequency of the recessive genotype is q^2 .

The frequency of the heterozygous genotype is $2pq$.

The frequency of the dominant genotype is $p^2 + 2pq$.

The frequency of the recessive genotype is q^2 .

The frequency of the heterozygous genotype is $2pq$.

The frequency of the dominant genotype is $p^2 + 2pq$.
